---

## **OBJECTIVE**

- To obtain a position to learn, innovate and collaborate with a team as a developer that will further my knowledge and expertise in the web development field.

## **TECHNICAL SKILLS**

<b>Programming / Languages</b>	TypeScript, JavaScript, HTML5, CSS3, Java, C, C++, C#
<b>Frameworks / Library</b>	Angular (1& 2++), Angular Material, React, Bootstrap, jQuery, Node, Spring, Hibernate, ASP.NET
<b>Database</b>	MSSQL, MS Access, MySQL, DB2
<b>Tools</b>	Visual Studio Code, Visual Studio, Spring Tool Suite, Eclipse, IntelliJ, MySQL Workbench, SAP Crystal Report, Postman, Photoshop, MS Office, Sublime Text, VMware
<b>Version Control</b>	Github, Bitbucket, SVN
<b>Server</b>	Amazon Web Services Cloud, Microsoft Azure

## **EXPERIENCE**

**Front-End Developer**  
**CGI Inc., Toronto, Ontario**

**Oct 2017 – Jun 2019**

- **Scotiabank “Credit 360” Project**
  - Built a project using Angular(v5.2) based Front-End project using a fat-client concept, component based application as a lead developer.
  - Designed reusable custom component, and OOP structure classes using TypeScript to customize data after receiving from existing API to clients’ needs.
  - Set up Git environment to control version based project using Bitbucket.
  - Implemented OAuth2, interceptor, and authguard to secure the application.
  - Applied clients’ requirements as same as they want using CSS3, SASS, Bootstrap 4, Zeplin, and Angular style guide.
  - Resolved clients’ complex requirements by creating custom libraries to keep entire application consistent.
  - Tested application’s stability using Karma and Jasmine; Test codes covered coverage as well (over 80%).
  - Used multiple Angular-friendly libraries such as ngx-translate, and ngx-spinner
  - Improved performances using Angular’s lifecycle.
  - Documented developer-friendly standards to keep the application consistent when new developers joined into the team.
  - Followed Agile methodology using Jira, Bitbucket to cooperate with team members.
- **Scotiabank “Ask HR” Project**
  - Contributed to a HR transformation project for finance/iTrade/knowledge documents as a Front-End developer using Angular(v1.8), Bootstrap3, CSS3, SASS, Gulp, Git, Jira, Confluence and Box(conetent management system).
  - Developed Search-Forum style dashboard user interface web application which can search/ download/ upload pdf type documents.
  - Followed Agile methodology using Jira, Github to cooperate with team members.
